Santa Barbara do Oeste, SP - Brazil

Education

Computer Science

Faculdade Anhanguera

January 2016 - December 2019

Languages

Portuguese - Nativo

English - Fluent

Skills

Full-Stack development using .NET Core, .NET Framework, ASP.NET WebForms, ASP.NET Core (API, Razor, MVC), Angular 2+, Ionic 2+, Vue, StencilJs, Node.js.

Databases: SQL Server, MySQL, DynamoDB, Postgres, Redis.

Continuous integration tools: Github Actions, Azure DevOps, creation of continuous integration and delivery pipelines (CI/CD), automated testing, release management.

Cloud infrastructure: AWS (Terraform), cloud resource management, infrastructure as code (IaC) using Terraform, network services such as Beanstalk and CloudFront.

Messaging protocols: Kafka, PubNub, RabbitMQ.

Agile methodologies: Scrum, Kanban.

Experiences

Fullstack Developer

AgileEngine

April 2022 - Presente

As a Full-Stack developer, I am responsible for developing systems using technologies such as .NET Core, Angular, Terraform, DynamoDB, Postgres, Redis, and Node.js. My main responsibilities include:

- Working collaboratively with the development team to design and implement scalable and secure software solutions, using the mentioned technologies.
- Developing APIs and screens using .NET Core and Angular, ensuring efficiency and quality of the developed software.
- Creating infrastructure on AWS using Terraform, ensuring scalability and security of the developed systems.
- Collaborating with other areas such as data science and frontend developers to create new functions and features for the developed systems.
- Participating in the scrum process to ensure the effectiveness and efficiency of software development.
- Participating in code reviews to ensure code quality and promote better development practices.

Senior Systems Analyst

CI&T

February 2022 - March 2022

As a software developer, I was responsible for developing software using .NET Core/.NET 6 technology, microservices-based applications, Kafka, and SQL Server.

Senior Developer

NAVA - Technology for Business

January 2021 - January 2022

As a Full-Stack developer, I was responsible for developing new processes, building APIs, unit testing, integration testing, background services, and web applications using .NET Core 3.1 technology.

.NET Developer

Pasquali Solution

July 2020 - January 2021

As a .NET Core developer, I was responsible for developing an internal tool using technologies such as Windows Forms, Entity Framework Core, Dapper, and MySQL.

Fullstack Developer

Tempus Digital

May 2018 - July 2020

As a Full-Stack developer, I was responsible for developing systems, web apps, mobile apps, and communication robots (IVR). To accomplish this, I used technologies such as ASP.NET Core (API, Razor, MVC), Entity Framework, and SQL Server on the backend, and Javascript tools on the frontend such as Angular, Vue, and StencilJs.

Systems Trainee

Indra

April 2017 - April 2018

As a .NET Framework developer, I was responsible for creating new screens and processes for insurance and capitalization systems using technologies such as ASP.NET WebForms, JQuery, and SQL Server.

Fullstack Intern

Tempus Digital

August 2016 - February 2017

As a Full-Stack intern, I was responsible for working on software development projects using various technologies, including ASP.NET Core/API, Entity Framework Core with SQL Server, Angular 2, and Ionic 2.
